

The Institute for Science & Interdisciplinary Studies, in collaboration with the Hampshire College lecture series on Scence and Values, presents

Trying to Change Science: The Story of Feminism

A breakfast talk with Dr. Evelyn Fox Keller

 $Image\ from\ the\ Center\ for\ Astrophysics\ Social\ and\ Recreational\ Club: \\ http://hea-www.harvard.edu/SRC/glowshirt.html$

Thursday April 24 8:30 - 10:00 AM

Faculty Lounge Franklin Patterson Hall Hampshire College

Free & open to the public!

Come have breakfast with Dr. Evelyn Fox Keller for some opening remarks and a lively and wide-ranging discussion on how feminism must - and *does* - try to change science studies. Prof. Keller is a leading feminist historian of science and has written several books including *Gender & Science* and *Secrets of Life, Secrets of Death*. She sees changing patterns of thinking, ideas of the world, and notions of reality as crucial aims of feminism. As a trained physicist and biologist, and a social analyst of science, she makes the connection to how science must change to fulfill the feminist program.

Bagels & coffee from the Black Sheep Cafe!

To ensure accessibility, all ISIS events are smoke- and fragrance-free. Thanks for your cooperation!
