

 *The Institute for Science & Interdisciplinary Studies presents*

ISIS's spring lecture series, "Sex, Biology & Science Ethics," continues with the award-winning film *MindWalk*, directed by Fritjof Capra. Capra is a distinguished physicist and author of *The Web of Life*, *the Tao of Physics*, and *The Turning Point*, whose work points to a new way of thinking potentially as important as the original scientific revolution.

Twenty-first century science is poised to go beyond the splits between fact/value, mind/body, and science/society.

Free and open to the public. A discussion will follow the film.

Weds. April 18 7:30 pm
West Lecture Hall
Franklin Patterson Hall
Hampshire College

MindWalk takes place on Mont-Saint-Michel, with the lovely French countryside in the backdrop. Politician Jack Edwards (Waterston) and poet Thomas Harriman (Heard) meet physicist and ex-American citizen Sonia Hoffman (Ullman), engaging a fascinating and remarkably touching dialogue on topics of quantum mechanics, Cartesian and Newtonian sciences, the natural state of the earth, mechanistic vs. holistic thinking, and an answer to the question "What is life?"

Co-sponsored by the Population & Development Program, the Civil Liberties & Public Policy Program, and the Dean of Faculty at Hampshire.

All ISIS events are smoke- & fragrance-free to ensure the widest accessibility.

Thanks for your consideration!
